

Nominee: SuDS Project Team, United Utilities

Matt Watson, Danny McDermott and Craig Daniels

Category	3. Outstanding Team
Nominators	Graham Parker, Head of Technical, Story Homes Limited
<p>As a developer we promote sustainability, but without a long term strategy to maintain a SuDS scheme, how do you guarantee its success?</p> <p>The SuDS project team at United Utilities have made this possible. They engaged with us early on to trial some SuDS systems to put up for adoption. This developed a set of standards that can now be applied to other North West regional developers at a technical approval to final adoption stage.</p> <p>We now have 2 schemes adopted through a section 104 agreement. These were good case studies to encourage other developers to engage, demonstrating this is possible.</p> <p>The team are open to discuss and promote the use of other sustainable systems that could be put forward for adoption in future. As a developer we are encouraged by this as this gives us more opportunity to explore these into our masterplans as an enjoyable and accessible feature alongside our housing developments.</p>
