

Dower House & Stoke Park development, Gloucestershire

Location

Stoke Park, Gloucestershire

Description

The site is comprised of wetlands, infiltration systems and swales. A large grassed swale sweeps across in front of The Dower House, along the route of the old carriage way.

Water is retained and filtered by a newly constructed retention pond and wetland, as well as the existing Duchess pond.

SuDS used

The following SuDS components were used on this site:

Swales

Retention pond

Wetlands

Infiltration systems
