

University of the West of England, Bristol

Location:

Stoke Gifford, Gloucestershire

Description:

The sites comprises wetlands, infiltration systems, swales and porous systems. Most of the original ponds and swales were constructed prior to the recent drive towards sustainable drainage solutions. The frontage of the site incorporates a number of wet and dry ponds with swales/low flow channels.

SuDS used:

The following SuDS components were used on this site:

Permeable pavement

Swales

Infiltration Systems

Retention ponds

Wetlands
